

Figure 13: Kopi Forest, "Abyssinia", Tuku Nature Reserve, Chatham Island.
Above: Canopy in February 1990. *Below:* Canopy in March 1993.
Possum control since 1990 has resulted in a healthier canopy, subtly apparent
in the increased leafiness of previously defoliated trees.

Figure 14:

Within Kopi Forest,
"Abyssinia", Tuku
Nature Reserve,
Chatham Island,
March 1993.

Left: A thicket of karamu
seedlings and saplings.

Below: New epicormic
growths of kopi.

Both are the result
of increased animal
control.

Figure 15: Vigorous regeneration of tarahinau saplings emerging from bracken within Tuku Nature Reserve, Chatham Island (right of fence); none where there are still cattle and sheep (left of fence). March 1993.

Figure 16: Wind-thrown akeake trees near Taiko Camp, Chatham Island. The tarahinau trees have withstood the gale. March 1993.
