

Fig 1

Location map and placenames. Also the areas observed to have at least some cherries during field survey November 1994. This is not a comprehensive map because only Governors Bush, Kitchener Fan, Ollivier Fan, Mueller Fan and parts of Foliage Hill, outer Mueller moraines and Hooker Flats were traversed.

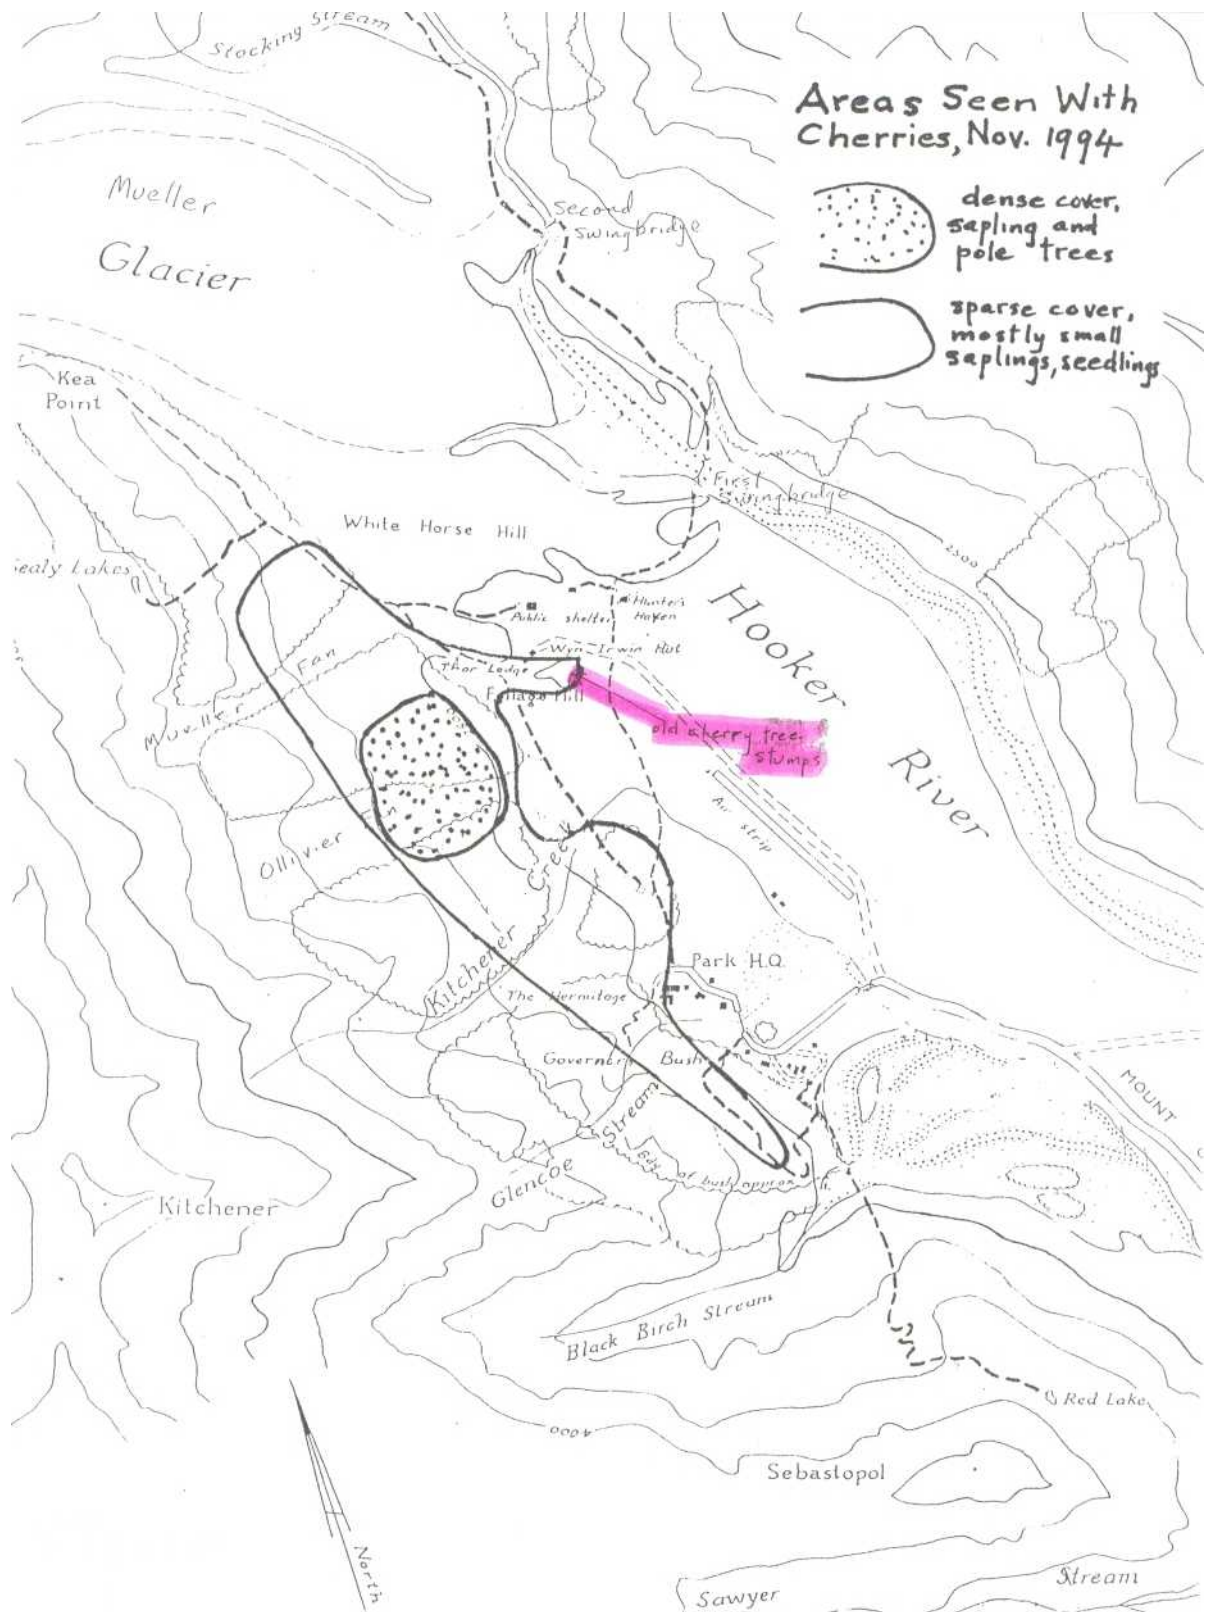

Fig 2

Areas infested by cherries and where control operations were carried out 1991 - 92 (P. Axford).
