

9. PLATES

Plate 1 Calibrating the LAI-2000 sensors at the reference site on a hilltop near the stream reach to be surveyed. The reference (A) sensor is fixed in position with laboratory clamps fitted to steel pins driven into the ground.

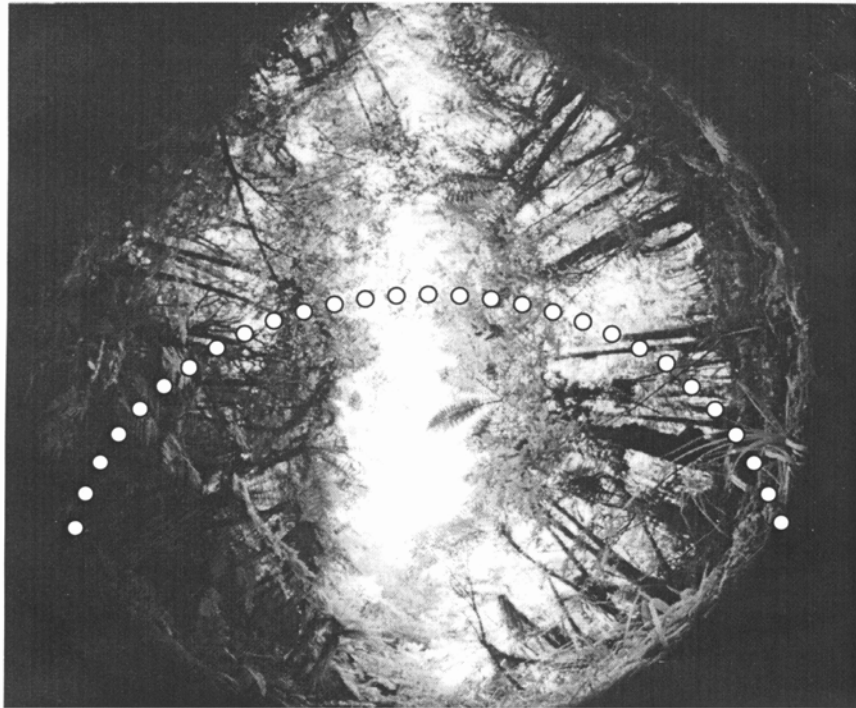

Plate 2 Taking readings with the LAI-2000 canopy analyser at stream level (B). A small plastic bottle was taped on the sensor 'wand' to avoid submersion.

Plate 3

Fish-eye lens photograph of the upper hemisphere at the stream light-monitoring site, Whakaki Stream, in Karikariki Reserve, at map reference S14 934790. The sun path at the time of the light-monitoring in early December, 1994 is indicated.

**Plate 4**

Fish-eye lens photograph of the upper hemisphere at a point in a representative pasture stream, Tunaek Stream (designated PT2), in the Hakarimata Range at map reference S14 928747.
